WORK EXPERIENCE:

AXOS BANK, San Diego, CA

March 2017 – Present

Senior Business Analyst / Product Owner

I am work as a Business Analyst / Product Owner in multiple projects related to our Online Banking platform. I work with the different business units to identify potential projects, create the discovery documents, prioritize the project's pool, etc. I also act as the liaison between the different BUs and the development team, acting as the Product Owner. I am in charge of the gathering of the requirements, creating the PBIs for the dev team, identifying risks and potential dependencies, facilitate integration of 3rd party vendors, etc.

ATOS CONSULTING, Tenerife (Spain)

IT Business Analyst

October 2013 – July 2016

As a member of the ARI (ATOS Research & Innovation) department, I was the IT Business Analyst in multiple FP7 and Horizon 2020 (H2020) projects related to cloud computing, being the **European Commission** the main sponsor/customer. These projects involved multiple partners from all over Europe and my main responsibility was to drive the exploitation of the project. This involved multiple tasks like, ensuring the alignment of the project with the vision of the consortium but also with the individual strategies of each partner, demoing the software and gathering feedback/requirements, transferring these to the development teams, identification of stakeholders and potential risks, comparative analysis with existing solutions, etc.

QWERTY SYSTEMS, Tenerife (Spain)

IT Consultant / Business Analyst

October 2009 – October 2013

In this position, I worked very closely with different customers from both government and private companies. During these years, I managed several projects end to end, helping our customers to adapt their business to the existing technologies, developing deployment plans, defining QA policies, coordinating with suppliers, ensuring the completion of the work on time and within allocated budget, etc.

UNIVERSITY OF TEXAS AT SAN ANTONIO, San Antonio (TX)

Graduate Research Assistant

August 2008 – August 2009

While in college, I worked part time as a GRA for the College of Business of the UTSA. My main duties consisted in conducting feasibility analysis (needs, opportunities, competitors, risks, ROI, etc.) and market analysis for different European Companies that wanted to enter the American Market. At the same time, I developed a "Startup guide for technology entrepreneurs" aiming to help new ventures to go from idea to the market.

QWERTY SYSTEMS, Tenerife (Spain)

IT Consultant

December 2007 – August 2008

After graduating from College, I worked as an IT Consultant / Sys Admin, of one of the company's customers. My duties involved helping company's users with their daily problems, the management of the Data Center, maintaining the website, controlling the network infrastructure, Active Directory, security copies (HP Data protector) and assisting the company's employees on their daily activities.

TENERIFE ISLAND'S GOVERNMENT, Tenerife (Spain)

Junior Developer

December 2006 – July 2007

While I was finishing my degree, I was offered a 7 months contract to develop a web application (using GWT, Java, PHP, SQL) for the control, management and analysis of the tourism statistics. This information was required by the Island Government to elaborate the yearly statistics and to inform the local authorities who keep track of the occupancy of the different hotels/apartments of the island.

EDUCATION:

- **University of Texas at San Antonio** **August 2009**
M.S. In Management of Technology
GPA: 3.8
- **University of La Laguna** **June 2007**
M.S. In Computer Science
- **University of La Laguna** **June 2005**
B.S. In Computer Science

INTERNSHIPS:

AURI (International Relationships University Association) 2007

Worked as webmaster of the International Relationships Association of the ULL.

- HTML, PHP, Javascript and MySql

Güimar City Hall 2004 - 2005

In order to comply with European Union regulations, all the wine bottles produced within the EU boundaries must have a barcode explaining all the ingredients (products, amounts, exposure times, etc.) used in that bottle. I worked on the creation of a Java application to help local wineries to comply with these regulations.

- Xoops Content Manager for the website
- Java, Eclipse and MySql for the application.

University of Missouri at Columbia, Asklepios Scholarship August 2002

In 2002, I worked for the Med School of the UMC, where I participated in the development of a software application to collect, control and manage the glucose levels of their diabetic patients over the phone pad.

- Graphical Voice Interface to manage the incoming calls and collect the data input
- HTML and PHP for the website and SQL databases

STUDY ABROAD:

- Socrates/Erasmus Exchange at Växjö Universitet – Sweden 2005 - 2006
